

Sarath Chandra Bokkela

Full Stack Developer | Java | Spring Boot | React.js | Next.js | AWS

+91 8688244519 | sarathchandra.bokkela@gmail.com | linkedin.com/in/sarathchandrabokkela | Bengaluru, India

Professional Summary

Full Stack Developer with 2+ years of experience building production-grade web applications using Java, Spring Boot, Spring MVC, and Spring Security on the backend, paired with React.js and Next.js on the frontend. Skilled in designing secure REST APIs, JWT-based authentication, and responsive UI development. Experienced integrating Generative AI solutions using Google Gemini into enterprise applications, optimizing database performance, and deploying scalable solutions on AWS. Strong track record of collaborating across full-stack teams to deliver reliable, high-quality production applications.

Work Experience

Software Engineer – Happiest Minds Technologies

Apr 2024 – Present

AI Voice Intelligence Platform

- Designed and developed scalable backend services using Java, Spring Boot, and Hibernate/JPA to power a high-volume audio processing and transcription platform.
- Built asynchronous processing pipelines enabling parallel transcription workflows, improving system throughput and reducing latency.
- Integrated AWS S3 and AWS Transcribe to deliver reliable, large-scale speech-to-text processing.
- Developed and secured REST APIs using Spring Security and JWT authentication, consumed by web and mobile clients.
- Integrated AI-powered insight generation (automated summaries and sentiment analysis), reducing manual analysis effort.
- Contributed to frontend components using React.js, integrating REST APIs and enhancing user experience and UI responsiveness.
- Wrote unit tests using JUnit and optimized MySQL queries and API performance, improving response times and system efficiency.

KPI Mapping and Data Discovery Platform

- Designed and developed backend services in Java, Spring Boot, and Spring MVC for defining and managing business KPIs across multiple product funnels.
- Built scalable REST APIs for real-time KPI tracking, analytics, and alerting.
- Integrated Google Gemini to automatically generate and recommend KPIs from business requirements, reducing manual effort and accelerating KPI definition.
- Modeled and optimized relational data structures in MySQL using Hibernate/JPA to support analytics workloads.
- Collaborated with cross-functional teams using Git for version control to deliver production-ready features aligned with business requirements.

Enterprise Digital Learning Platform

- Developed responsive, cross-device frontend modules using Next.js and Material UI, delivering a consistent learning experience across desktop and mobile.
- Integrated Next.js frontend with NestJS REST APIs backed by PostgreSQL for dynamic content delivery.
- Improved application accessibility and implemented dark mode support, enhancing usability across diverse user preferences.
- Identified and resolved UI defects to strengthen platform stability and improve overall user experience.
- Wrote frontend unit tests using Jest to improve code reliability, catch regressions early, and support maintainable development.

Technical Skills

- Languages:** Java, JavaScript, Go, SQL
- Backend:** Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Spring AI
- APIs & Security:** REST APIs, JWT Authentication, API Gateway
- Frontend:** React.js, Next.js, HTML, CSS, Material UI, Bootstrap
- Databases:** PostgreSQL, MySQL, Oracle
- Cloud (AWS):** EC2, S3, IAM, RDS, AWS Transcribe
- Testing:** JUnit, Mockito, Jest
- Tools:** Git, GitHub, Postman
- IDEs:** Eclipse, VS Code, Cursor
- AI Developer Tools:** GitHub Copilot, Claude

Education

GMR Institute of Technology

Bachelor of Technology (B.Tech) – Electrical and Electronics Engineering

2019 – 2023

CGPA: 8.59 / 10.0

Achievements

- Won 1st Prize at BLITZ 2025 Tech Accelerator for designing and presenting an AI-powered analytics platform, selected as the top team among 50+ competing entries.
